DETAILED ACTION

Rejections Withdrawn

Claims 1-2, 6-8 and 16-17 rejected under 35 U.S.C. 102(b) as being anticipated by English abstract of Japanese: 4-319433 for reasons of record in paper no. 9, paragraph-5, mailed on July 7, 2003.

Claims 1-2, 6-11 and 16-17 rejected under 35 U.S.C. 103(a) as being unpatentable over the English Abstract of Japanese:4-319433 for reasons of record in paper no. 9, paragraph-7.

Claims 1-2, 6-11 and 16-17 rejected under 35 U.S.C. 112, second paragraph for reasons of record in paper no. 9, paragraph-9.

Response to Arguments

1. Applicant's arguments with respect to claims 1-2, 6-11 and 16-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 6-11 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Nobuo (English Abstract of Japanese: 8-247629).

Nobuo relates to laminate comprising a substrate (2), an adhesive (9) which comprises a foaming agent (11) and at least one selected from a thermosetting resin and a photosetting resin, and an adhesive that does not become capable of release when receiving energy (6). The adhesive (6) is a polymeric material and the adhesive (9) can be acrylic. In the alternative, the portion of the adhesive (9) next to the layer (6) appears to be free of the foaming agent (as shown in the drawings) and hence, is taken to be adhesive resin that does not become capable of release in the absence of the foaming agent. Further, figures 2 and 3 shows that the laminate can include another adhesive (9) and another substrate (5) on the opposite surface of the layer (6).
